Educational Services

EPIC Disability Advocacy provides educational services in pursuit of its vision that all persons with disabilities will have access to the resources, programs, and services needed to reach their full potential.

EPIC provides virtual, online, and in-person training, including courses, lectures, seminars, and workshops aimed at empowering neurodiverse individuals, including those with intellectual and/or development disabilities. To ensure the broadest impact possible, EPIC also provides educational services to the individuals who work with nuerodiverse individuals. All training and courses are supported by comprehensive materials distributed during sessions, aiding participants in achieving their personal and professional goals. EPIC also offers a non-downloadable webinar training feature that includes instructional lessons for neurodiverse individuals and professional development training for those who support them.

EPIC's training team has professional experience in curriculum design and construction, speech language pathology, social work, public policy, communications and marketing.

EmpowerU

EmpowerU is a 12-month journey that focuses on personal development and self-discovery, helping neurodiverse individuals aged 16 and up unlock their full potential. Participants gain practical life skills and develop through two core series: Self-Determination and Self-Advocacy. EmpowerU helps individuals better understand themselves, leading to self-discovery, independence, confidence, and leadership skills to navigate life with strength, purpose, and enhanced self-awareness.

Professional Training Services

EPIC Disability Advocacy provides training to educators, professionals, and workers to improve services and support for the neurodiverse population. EPIC can customize training to meet the needs of individual educational institutions, organizations, and municipalities. EPIC's professional development training courses equip participants with skills and techniques to better serve neurodiverse individuals in education, employment, and community settings.
